General Description:

Jieshengda Technology JSD TA-2002 2-in-2-out analog signal isolation transmitter is a signal conditioner with electrical insulation between input and output, it can receive a variety of analog signal from the field instrument, and transmit a standard output signal or user-specified special signal to the control room、 PLC、 PC or DCS. The product is isolated between power supply, input and output, the isolated voltage between them is up to 3000VDC .It is widely used in the power isolation, monitoring and control of industrial site, power monitoring, medical electronic equipment, analog signal isolation and acquisition etc. Adopting optical isolation technology, compared with the electromagnetism isolation transmitter has a stronger anti-EMC electromagnetic interference ,it is available to keep free gain adjustment and zero adjustment ,low temperature drift and good linearity, suitable for using vibration, damp industrial field, the international standard DIN35mm rail mounting, user-friendly installation. .If 1-in-3-out/1-in-4-out/3-in-3-out isolation transmitter please purchase JSD TA-1003/JSD TA-1004 and JSD TA-3003 series. AC power supply please purchase the JSD TA-X50X series, two/three-wire isolation transmitter please purchase JSD TA-1021/JSD TA-1031 series.
